

# CREATE YOUR OWN GALLERY WALL

## INSTRUCTIONS

1. The average couch is 86" wide and 36" tall — hang art approximately 4" above the top of your sofa. You may want to adjust your first piece slightly to the right or left to accommodate for your other pieces.
2. Align artwork in the bottom row of your gallery wall so that each piece is 4" above the couch.
3. Leave a little room between your framed artwork. Each piece should be 2" to 5" from the piece next to it on an average 8.5 foot wall. Trust your eye when it comes to spacing and arranging.
4. All your art may not be exactly sized to fit this template — leave room for adjustments. If you are unsure of a layout, cut craft paper to match each piece and create the perfect layout by taping them to your wall.
5. Hang each piece starting at the bottom center.
